

CABRILLO COLLEGE
Radiologic Technology Program

Program Effectiveness Data

In addition to the mission, goals and student learning outcomes listed elsewhere on this site, the performance of the program is reflected through program effectiveness data as defined by the Joint Review Committee on Education in Radiologic Technology (JRCERT, 20 N. Wacker Drive, Suite 2850, Chicago, IL 60606-3182, 312-704-5300, www.jrcert.org). Program effectiveness data includes the program completion rate, credentialing examination pass rate and job placement rate. Explanations of these measures and program data that correspond with the annual report most recently submitted to the JRCERT are noted below. This information can also be obtained at www.jrcert.org/resources/program-effectiveness-data.

Questions about program effectiveness data should be directed to the Director of the Radiologic Technology Program.

The radiography program's 2017 annual report to the JRCERT reflected the following:

Completion Rate – January 1 through December 31, 2017

This is an annual measurement of the number of students that began the program divided by the number of students that actually completed the program. The program's completion rate for 2017 was 77%. Seventeen of the 22 students expected to complete the program in 2017 went on to complete it in that year.

Credentialing Examination Pass Rate – 2013 – 2017

This is the number of students that pass the American Registry of Radiologic Technologists (ARRT) certification examination on the first attempt within six months of graduation from the program. The figure reflects an average over a five-year span. The program's credentialing examination pass rates stated as an average from the years 2013-2017 is 97%. Eighty-one of the 83 graduates of this program taking the ARRT certification examination within six months of graduation passed on the first attempt.

Job Placement Rate

This is the number of students that gain employment in the radiologic sciences within twelve months of graduation. This number may not be the same as the number of graduates as the program only reports those graduates who actively sought employment. The figure reflects an average over a five-year span. The program's job placement rate as an average from the years 2013 through 2017 is 90%, seventy-five of the 83 graduates who actively sought employment, obtained employment in the radiologic sciences within twelve months of graduation.
